Blockchain For Ngo's 🎯

Self Sovereign Identity + DLT Use case

What is problem statement?

not just India but all country's are facing a challenges to resolve identity in different domains, Most common problem is seen in under the name of Non-governmental organizations {NGO's}, to steal money from citizen.

if we dig down, in India as per 2024 data approximately we have 31 lakh (3.1 million) registered NGO's and this a big number.

What is problem statement?

.

Premium

India has 31 lakh NGOs, more than double the number of schools

These statistics have come to light after the CBI collated information from all states and Union Territories to list NGOs registered under the Societies Registration Act.

Blockchain For Ngo's 🎯

Self Sovereign Identity Use case

Challenges?

1. fake worker in NGO's
2. NGO's relays on donation and sponsorship, complex verification process has direct impact on NGO's performance.
3. identity verification process is complex and slow
4. transparency within the NGO's management, are they using funding in correct way?
5. many more....

Identities For NGO's Using Blockchain🎯

Self Sovereign Identity Use case

Solution?

Digital identity platform which will be used by every NGO's to publish there user Identity publicly so, each and every citizen of India can verify works identity before making any donation or partnerships.
same way one NGO and verify other NGO's identity before collaboration.

Self Sovereign Identity Use case
