

Private Blockchain Project Idea - Tech Stack

Backend Tech Stack

- ① 1. Blockchain core concepts
- Who it works?
 - What is Network, node...?..
- ② 2. Cryptography
- encryption and decryption
 - Hashing
- Point 3. Server-side programming language
- Node.js, JavaScript
 - Python
 - JAVA
 - Go lang
 - Rust
4. Databases Knowledge
- MongoDB
 - Postgres
 - SQLite
 - MySQL
 - MS SQL
- Imp

5. Linux OS / MacOS Understanding

- virtual machine

6. DevOps knowledge

- docker
- cloud understanding and its core services
- kubernetes (k8's)
- shell scripting (power shell OR bash)
- git & GitHub {control version}
